### COLLEGE PROJECT WORK DETAILS

**Name of the Project:** Cellphone operate spy robot

#### Description of the project:

Main aim of our paperwork is to study development of the mobile operated spy robot. The robot is in form of a vehicle mounted with a web cam, which acquires and sends video to a TV or PC. The movements of vehicles are controlled by microcontroller. We can't forget 9/11 when 101 people including nine foreigners & 14 policemen have lost their lives while about 300 people were injured in the worst terror attack seen in country in which desperate man fired indiscriminately at people. Our idea is to make a robot to tackle the hostage situation & the worst conditions which cannot be handled by human being. Humans are moved out from direct exposure to potentially dangerous situations. Robotic system can perform many security and surveillance functions more effectively than humans.
